OPEN LETTER

Dear Sir,

RE: COAL MINING EXPLOITATION
GALILEE BASIN, QUEENSLAND, AUSTRALIA

I write on behalf of members and concerned citizens, in relation to reports of your company's intent for mining of coal in this unsullied region of Australia.

The concern is that any such undertaking by foreign corporations is essentially economic imperialism, which undermines Australia's integrity and independence, and is therefore not in the interests of our Peoples' Commonwealth.

In addition, the connected destruction of the ecological balance and environment of the region, inherently catastrophic through such open cut mining and accompanying infrastructure, is unacceptable to the preservation of the health of our Native Soil, its underground aquifers, surface water systems, and wild life. The Great Barrier Reef will also be subject to unavoidable deleterious effects from this mine activity. As well, the lifestyle and culture of the communities of our Sacred Black Aborigine Races in the region would face dissipation and collapse.

Whilst it has been reported that Messrs Greg Hunt and Annastacia Palaszczuk, members of the political caste in Australia, have been acting to facilitate your imperialist intent, you should understand that such is without any sanction of the Australian People, and from whom our Australian Peoples Movement will ensure accountability for such treasonous actions.

It may also be that your corporation has been influenced by the large scale transfer of Indian nationals underway to Australia, engendered particularly through the political castes appointment of your fellow Muslim Indian, Abdul Risvi, to Head Secretary of their Immigration Department, a virtual recolonisation process that has never been sanctioned by the Australian People as it undermines and degrades our European derived civilisation. This is a matter that can now only be addressed by either their voluntary departure, or directed repatriation back to your own country.

I therefore caution your corporation against ignoring this situation in continuing with this proposed imperialism, and bring to your notice that our Australian Peoples Movement, under the full authority of our People, will enforce without redress or compensation, the eradication of such projects, as a necessity for our National self respect and independence.

I urge your corporation to add to the process of mutual respect between the Australian and Indian People by refraining from such imperialistic activity as has been reported.

To this end I request a public announcement from your corporation rescinding any such intent, which will effectively close this very important matter.

Your immediate attention will be appreciated.

Yours faithfully,

Bob Beavers
State Convenor
